

Case Study 3 : Architect Specified Application

Client: Mr Mark Casey - www.mccasey.co.uk

Project: An installation of windows, doors and conservatory

Installer: Joedan
Manufacturing UK Ltd

Product Description: Slate
Grey polyester powder
coated aluminium windows
and doors

These new modernist homes built by Mr Casey required state of the art windows and doors. In addition to more conventional sized windows, large areas of glass were required. Our Euroline range of multi-pane, sliding patio doors were installed thereby achieving the architect's design requirements. When in the fully open position the patio doors created the effect of the outside space integrating with the living areas within the properties. The dark grey polyester powder coating provided a pleasing contrast with the white wall finish. The double-glazed units, incorporating low emissivity and argon as filled cavities, provided the high insulation value required.
